

S. Security Awareness Training (SAT)

Defend your organisation against cybercriminals and strengthen your 'human firewall'.

Defend your organisation against cybercriminals and strengthen your 'human firewall' with our engaging, automated training. Run realistic phishing simulations, grow your staff's cyber defence skills, and track effectiveness with detailed reports and dashboards.

How Security Awareness Training works

Our SaaS web-based application delivers online security training for your employees, automatically serving simulations and training content to the right people at the right time.

- ✓ Out of the box configuration allows for rapid, effective deployment without administrative burden
- ✓ Add-on package included if organisation has Microsoft 365 E5 or Microsoft Defender for Office 365 Plan 2, which includes threat investigation and response capabilities
- ✓ Fully SCORM compliant for users wanting to house content within their learning management system (LMS)
- ✓ Single sign-on for users
- ✓ Multi-lingual options - important for customers with multiple office locations
- ✓ Automated delivery of simulations and training
- ✓ Automatic report and dashboard creation

SECURITY AWARENESS TRAINING FACTS

- 74% of all cyber attacks start at the inbox
- 92% of Malware is delivered via email
- 7 out of 10 businesses currently don't invest in cyber awareness
- 43% of all cyber attacks aimed at SMB's
- 14% of global Phishing is aimed at Office 365 account takeovers
- More than 35% of leaders think their site will suffer a cyber breach in the next 12 months
- Over 90% of Cyber Attacks involve Staff Error
- Hackers target file corruption via Malware

Microsoft365 Integration

Censornet Security Awareness Training has been developed with a Microsoft365 integration that will handle the management of your employees meaning that you can deliver one of the best cyber security training programmes available in the market.

Metrics and Reporting

The report suite is industry leading, providing you with insightful metrics on the following;

- ✓ Risk Score - Company Wide
- ✓ Risk Score - By Department

- ✓ Risk Score - by individual
- ✓ Heat maps showing overview of simulation
- ✓ Engagement by type
- ✓ Users enrolled in security awareness training programme
- ✓ Course complete rates
- ✓ Timeline of cyber courses

Available Courses:

Phishing	Social Media	Online Shopping	Safe Internet Usage
Remote Working	Passwords	Online Habits	Social Engineering
Spot the Phish	Malware	Physical Devices	Ransomware

Autonomous Integrated Cloud Security

Secure your entire organization from known, unknown & emerging email security threats - including email fraud.

Defend your organisation against cybercriminals by strengthening your engaging and stimulating automated training.

Protect users from webborne malware, offensive or inappropriate content & improve productivity.

Discover, analyze, secure & manage user interaction with cloud applications - inline & using APIs.

Reduce impact of large scale data breaches by protecting user accounts with more than just passwords.

Control user access with complete identity-threat protection. Automatically authenticate users using rich contextual data.

Our Platform

Our cloud security platform integrates email, web, and cloud application security, seamlessly with identity management and advanced data loss prevention to activate the Autonomous Security Engine (ASE).

This takes you beyond alert driven security and into real-time automated attack prevention.

Advanced DLP

Prevent sensitive data getting into the wrong hands.

Enterprise-grade DLP across email, web and cloud applications for the ultimate real-time protection.

Autonomous Security Engine

Prevent attacks before they enter the kill chain.

Enable traditionally silo'd products to share and react to security events and state data whilst leveraging world class threat intelligence.
